Oregon Watershed Enhancement Board - OWEB		
Council Support/SWCD OWEB supports the capacity of watershed councils and soil and water conservation districts so that the state has an enduring, high capacity local infrastructure for conducting watershed restoration and conservation. These grants help support the operations of effective councils and districts that engage people and communities to participate in collaborative, voluntary restoration and protection of native fish or wildlife habitat and natural watershed functions to improve water quality or stream flows.	\$255,623	
Monitoring/Effectiveness Monitoring OWEB grants support a range of monitoring activities, including (but not limited to) baseline monitoring, status and trend monitoring, and effectiveness monitoring. This monitoring helps to document watershed conditions, track changes in critical habitat and species over time, and evaluate the effectiveness of conservation and restoration efforts.	\$55,219	

	Lottery Grant	Lottery Loan
Restoration These grants support on-the-ground restoration work that improves water quality, benefits native fish or wildlife habitat, or protects or restores ecosystems. Examples of restoration activities funded by these grants include riparian planting, fish habitat improvements, wetland restoration, upland habitat conservation, and removal of barriers to fish passage, to name a few.	\$348,020	
Technical Assistance These grants play a key role in developing future restoration grant proposals and increase the capacity of local partners to engage in project planning, design and permitting.	\$95,188
