**PRINTED TIPS**

- The printer should have only one stack of paper loaded in the tray. Extra paper should be stored in a secured, dry area.
- Fan the printer paper before loading it into the printer.
- Do not use printer paper if it is damp or wet, because this will cause the printer to malfunction.
- Be sure to remove all audit slips from the printer after a door has been opened or when power has been cycled.

**BILL ACCEPTOR TIPS**

- Bill jams - Main VLT power must be turned off when removing the bill acceptor transport unit.
- When removing cash from the cash box, there is no need to power down or cycle power on the terminal.
- After removing cash, make sure the cash box is reinstalled firmly. You know the cash box is firmly installed when you hear or feel it “click” into place.
- If the bill acceptor makes a noise and pauses when it accepts bills, this is normal operation. The bill acceptor is centering the bill.
